

CONSTRUCTION UPDATE

WE REQUIRE YOUR ASSISTANCE IN ORDER TO SWITCH YOUR WATER TO A TEMPORARY SERVICE

We're working to improve infrastructure in the Town and are undertaking water main improvements at Main Street and Spring Creek Drive. We will be installing temporary water services to your home during construction.

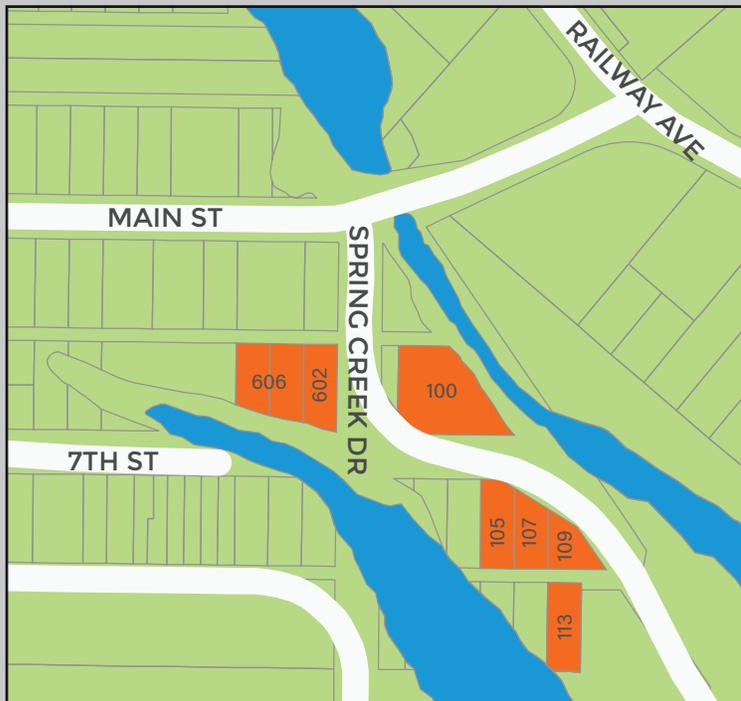

**The scheduled date to connect your home to a temporary service is:
Friday MAY 5th 2017.**

Please provide **contact information** and preferred **time-of-day** for tie in work, by **email to sgilmour@professionalexavators.com** so we can ensure someone is at home for the work. **No work inside the home is required by the Town. If we missed you, and your water has not been turned back on, contact Shane Gilmour at 587-438-5330.**

We understand this is an inconvenience and apologize in advance for the disturbance.

If you have an emergency or concerns contact Shane Gilmour at 587-438-5330.

For inquiries, or to learn more about the project, email us at engineering@canmore.ca or phone 403-678-1504.

PROPERTIES BEING CHANGED TO TEMP WATER SERVICES ARE SHOWN IN ORANGE

When your home is switched to a temporary service, EPCOR will shut-off the water at the curbstop, and the Town's Contractor will connect the temporary service from a potable water hose to a hose bibb outside of your home.

Immediately after the tie-in is made, we recommend that you check visible fittings at toilets, sinks etc. to check for potential leaks.

If you are having issues with water pressure after the service is installed, pressure can be reduced or increased at your request.

Thank you for your patience, assistance, and understanding as we work to upgrade your services.
