CONTRACTORS COMMENTS:

While the contractor is satisfied by the response rates of the 2008 census, the following must be kept in mind in regards to the data collected.

There was a 2% non response rate in houses where we know absolutely nothing about the residents.
Approximately 1500 of 2000 non permanent houses responded via email in an early enumeration.

There was substantial third party cooperation in getting the census completed. The large unknown numbers reflect this.

Appendix D - Dwelling Type Definitions

*** see contractors comments*** for further necessary information

Single family detached dwelling means a single detached building containing one dwelling unit only, and used exclusively for the Residence of not more than one Family.

Single family with suite or Single family detached plus dwelling means a single detached building designed to contain one primary dwelling unit and one secondary suite, under one title, used exclusively for the residence of not more than one family per dwelling unit and where the primary dwelling unit and secondary suite may be connected by an interior door directly connecting the primary dwelling unit to the secondary suite. Exterior access to the secondary suite shall be subordinate in both size and appearance to the access of the primary dwelling unit. **Dominant**

Accessory Suite or Secondary Suite means development consisting of an ancillary, self-contained dwelling unit located in a structure in which the primary use is a single family dwelling unit. A secondary suite has an entrance separate from the entrance to the primary dwelling unit, either from a common indoor landing or directly from the exterior of the structure, and may be connected by an interior door directly connecting the primary dwelling unit to the secondary suite. Exterior access to the secondary suite shall be subordinate in both size and appearance to the access of the primary dwelling unit. **Subordinate**

Note: this use class does not include Duplex Housing or Apartment Housing, where the structure was initially designed for two or more dwellings.

Duplex means a single building containing two dwelling units either side-by-side with a common wall extension from the foundation to roof, or one above the other, each having a separate entrance.

Semi-detached Dwelling (see “duplex”)

Townhouse means a single building comprised of three or more dwelling units separated from each other by walls extending from foundation to roof, with each dwelling unit having a separate, direct, at grade entrance. This includes all row, linked, patio, garden court or other housing which meet these criteria. A townhouse development may consist of a group of buildings each of which contains three or more dwelling units.

Townhouse, stacked (see Townhouse) means a multiple dwelling comprised of three or more dwelling units and constructed such that one or more dwelling units are located totally or partially above another dwelling unit, and have a separate, direct entrance from grade or landscaped area. A stacked townhouse development may consist of a group of building each of which contains three or more dwelling units.

Apartment building means a single building comprised of three or more dwelling units with shared entrance facilities.

Mobile Home or Manufactured home (“trailer”) means a dwelling unit or series of dwelling units built in an enclosed off-site factory environment in one or more sections and intended to be delivered and assembled at a residential site. New manufactured homes shall be constructed to either the CSA Z241 or CSA A277 standards and installed to CSA Z240.10.1 standards or on a permanent foundation.

Institutions – Hospitals, nursing homes etc. where there are no separate cooking facilities.

Other - a dwelling unit that does not fit into the above categories. This includes recreational vehicles, a hotel or motel used as a residence, a tent, etc.

Tenancy Status

Tourist Home means a Dwelling unit operated as an Accommodation Unit, occupied by a Guest or Guests for a period of less than 28 days.

For the purpose of clarity, a homeowner may occasionally rent or otherwise permit a Guest or Guests to occupy their home for short periods of time without turning their "Dwelling Unit" into an "Accommodation Unit" and therefore a "Tourist Home". For example, a homeowner who participates in a home exchange program in which another person or family occupies the homeowner's Dwelling Unit for a short period would likely not turn their Dwelling Unit into a Tourist Home.

What distinguishes a Dwelling Unit from a Tourist Home is the institutionalized commercial nature of a Tourist Home. For example, a Dwelling Unit that is managed, advertised and leased by a professional property manager, who uses a system of reservations, deposits and confirmations, collects G.S.T. and accepts credit cards would be considered a Tourist Home. This is not an exhaustive list of what may constitute a Tourist Home. This example is provided only to illustrate one way in which a Dwelling Unit may be turned into an "accommodation unit" and therefore become a Tourist Home

Non Permanent Tenancy Status

Own- the resident has self-categorized as owning the unit

Rent- the resident has self-categorized as renting the unit (not to be confused with vacation homes).

Unknown- we were unable to speak to anyone at the domicile to get self-categorizing info. Other sources identified the domicile as a weekender home.

Non Permanent and Permanent resident

Permanent Resident - (see Municipal Affairs - Special Circumstances award Canmore). Separate attachment.

Non Permanent Resident - persons with permanent address elsewhere and usually occupy the household on a non permanent basis.
