### **3.4.3 SPECIFIC SLIDE DETAILS**

The successful Proponent will be expected to coordinate with the Town of Canmore's waterslide maintenance contractor (The Slide Guy, Calgary, or other qualified waterslide specialist) for all waterslide scope of work components. It is expected that sections of slide will require dismantling to allow access to demolish the slide slab and construct the new slab and therefore shoring will be required to adequately protect the structural integrity of the slide.

Notes to consider when working with the slide:

- Slide sections are bolted and glued together.
- Slide is susceptible to cracking if not handled with sufficient support.
- Slide can only be shored along its sides; shoring from beneath will result in damage.

### **3.4.4 COORDINATION DETAILS**

Access to the slide area will be through the aquatic centre double doors (northwest corner, refer to Appendix B). Interior access pathway from the double doors to the work area is limited to the pool deck, width to be confirmed on-site. A single access door is also available at the base of the water slide stairs as shown on Appendix B. A potential laydown site is highlighted on the southeast corner of the Elevation Place lot (refer to the Site Plan in Appendix B). Alternatively, an area may also be set up intermittently in the area near the buildings' waste management containers. The public pedestrian path adjacent to the building is intended to remain open for the duration of the project.

Proponents must supply their own mobile lifts if they are required, however, track mounted lifts are not permitted on the pool deck walkways. The Town owned rubber-tired lift has a gross vehicular weight of 6571 lbs, and the Proponents lift should not exceed this weight without engaging a structural assessment.

Rig mats are required to protect the tile flooring, and the Proponent is responsible for ensuring the structural integrity of the tiles as well as cleaning any discolouration.

Pool gutter grates may not be driven or stepped upon; damages will be replaced prior to demobilization by the Proponent. The aquatic centre flooring must be protected during all construction.

Proponents should note and plan their work forecast with the knowledge that the temperature of the aquatic centre is typically 30°C with approximate 50% humidity. The temperature will fall to approximately 20°C during the annual closure.
